The final vote is in from IARC:

Inhaled talc is Group 3 - Unanimous vote
"Perineal" is Group 2B - Unanimous vote (Appropriate qualifying language is to be made to the descriptor "perineal". Cosmetic talc will not be the language.

Subject: News from Dr. Muscat

Josh reports the following from the IARC Meeting Plenary Session:
Industrial Exposure - Inadequate in Humans
Perineal Dusting - Limited Evidence in Humans (No votes - Drs. Wylie, Antony and Yu). Provided all voting group members voted tally would be 13-3.
Animal Evidence - Unanimous on limited (Dr. Antony dissented with an inadequate vote)
Overall classification:

Inhaled talc is Group 3 - Unanimous vote
"Perineal" is Group 2B - Unanimous vote (Appropriate qualifying language is to be made to the descriptor "perineal". Cosmetic talc will not be the language.
Speak to you on the call at 18:45 Lyon time.
