Dear Al:

ASTM: Dust/Talc Committee
D 22.04 TG 1.07

Fred Lawrence called me recently and we talked about the gap which Oulton left in the development of the standards covering dusts generally and talc in particular. I now have Fred's letter of 1/12/82 and have advised him that I will continue on with the work to try to bring it to a definite issue in due course.

Please review your ASTM files with a view of separating out anything relating to the two standards which we were developing. I can then compare them with the stuff I have and also with the negative ballots in the ASTM material Mr. Lawrence dispatched to me. I am not at all sure that Oulton submitted the latest drafts on the items to Mr. Lawrence and will call you in about a week to make sure we have the latest versions to pursue.

No doubt we will be together at the Dearborn meeting in April, at which we can go into the situation more fully.

Sincerely,

W. H. Ashton
