

An Olympic Gold Medal in Her Future

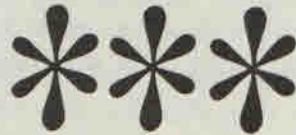

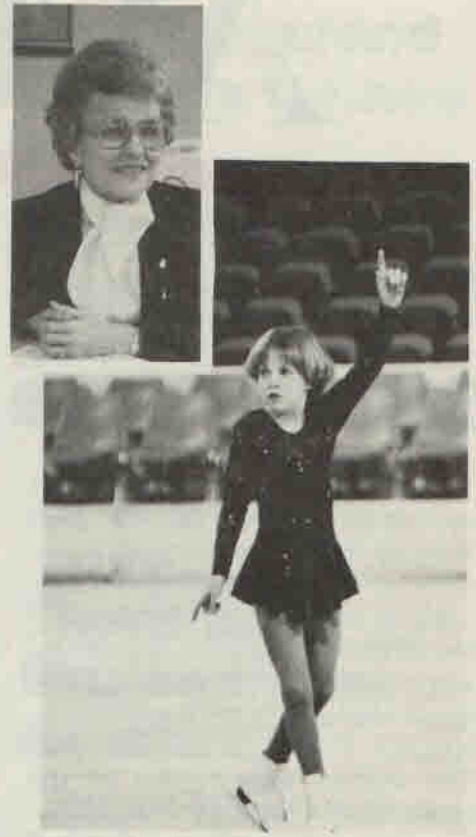

Nine year old Natalie Burton appeared in the opening production number of the 1980 Ice Capades. Twenty-five young Kansas City skaters were selected to perform in a special dual anniversary salute — the centennial of the founding of the Kansas City Star and the 40th anniversary of the Ice Capades.

The youngsters, ages 9 through 13, were recommended for the show by area ice skating rinks. Edmund Fink, retired promotion manager of the Kansas City Star and a figure skater conceived the idea for the number, "A Century of Service." In cooperation with skating coach, Randy Brilliantine, Mr. Fink choreographed the number and rehearsed with the youngsters. Coach Brilliantine was responsible for Natalie's being selected.

After seeing her skate, he told her parents she had a natural talent and could easily be Olympic material.

Opening night of the Ice Capades was a sell-out and we have it on the best authority that Natalie's performance was great! Her grandmother smiled as she told us, "We have eleven grandchildren that we're extremely proud of, still it would be so special if Natalie made it to the Olympics."

Marge Burton beamed with pride as she related the exciting events which have taken place for her granddaughter Natalie.

It's All Systems Go!

Several months ago, we had an article on the Avon nail enamel lines moving from Morton Grove to Suffern. A portion of the transition has been completed and the nail enamel is rolling out on schedule. Russ Imler, vice president manufacturing, said the Suffern location was a "natural" to produce nail enamel because of their recent property acquisition and they are near suppliers. Many people were involved in the successful move — and being a part of the "start-up" crew was a challenge.

We will see the results of their efforts with one of the "star features" in Campaign 11... the new Ultra Wear Creme Enamel. It is Avon's longest-wearing, shiniest nail enamel which will be available in 14 new shades!

ULTRA WEAR

It's Avon's newest, longest-wearing, shiniest nail enamel ever.

PROTECTS AGAINST CHIPPING AND PEELING FOR DAYS.

LABORATORY TESTS PROVE IT. NEW ULTRA WEAR OUTPERFORMS, OUTLASTS AND OUTSHINES THE 5 LEADING COMPETITORS.

A SCIENTIFIC BREAKTHROUGH FORMULA SO UNIQUE, IT'S PATENT-PENDING.
